ABOUT NIVOC

WhiteRock Pvt. Ltd. – NIVOC business is a growing brand in offering Ceiling and Interior Solutions in India.

NIVOC is a trusted B2B interior material brand in India, specialising in high-quality wall panels and ceiling systems. Backed by the strong legacy of WhiteRock, NIVOC provides reliable solutions for dealers, contractors, architects, and large-scale projects.

Catering to the evolving demands of modern architectural and exterior spaces, we are delighted to present the “Soffit Panel Catalogue” — a comprehensive guide to premium soffit panel solutions designed to enhance exterior ceilings and facades with style, durability, and performance.

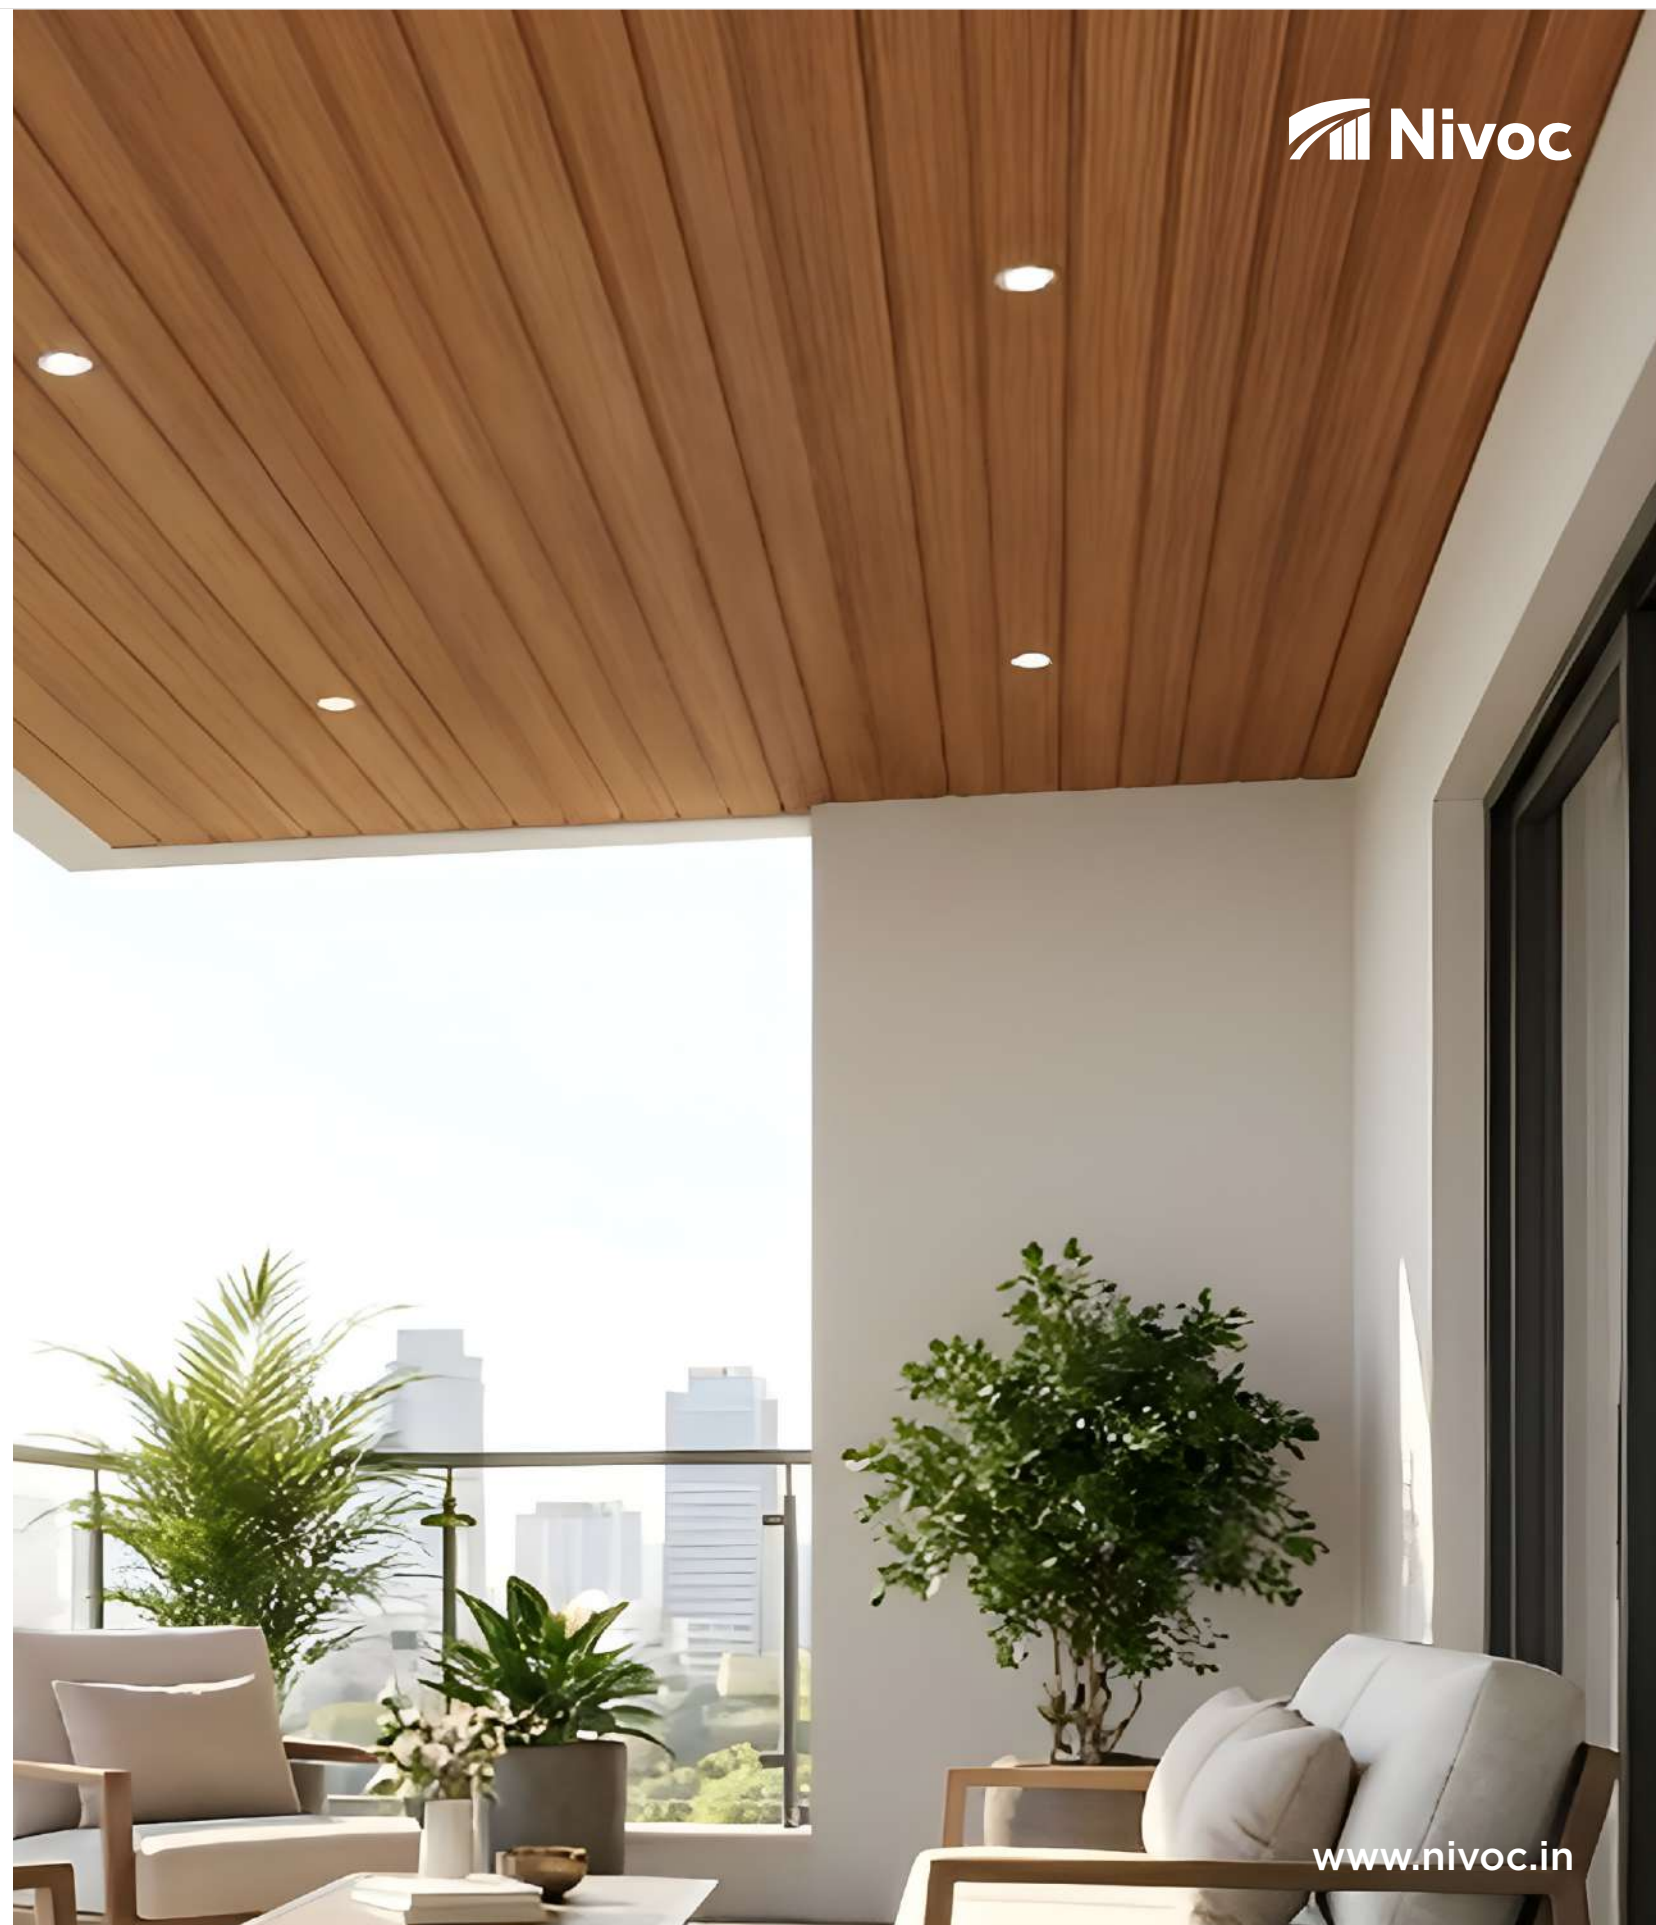

Curated with industry expertise and deep understanding of contemporary construction trends, this catalogue showcases innovative designs and practical solutions that bring elegance, protection, and long-lasting value to residential as well as commercial spaces.

OUR PRODUCTS & SERVICES

NIVOC offers advanced ceiling solutions designed for modern interiors, combining durability, performance, and aesthetics. Our soffit systems are engineered to withstand diverse environmental conditions while maintaining their elegant wood-finish appearance. Built for long-term reliability, they offer a low-maintenance solution for residential, commercial, and hospitality projects.

Backed by industry expertise and a deep understanding of on-site requirements, NIVOC ensures consistent quality, seamless installation, and dependable supply support across every project. From commercial to residential applications, our systems are built to enhance both functionality and visual appeal.

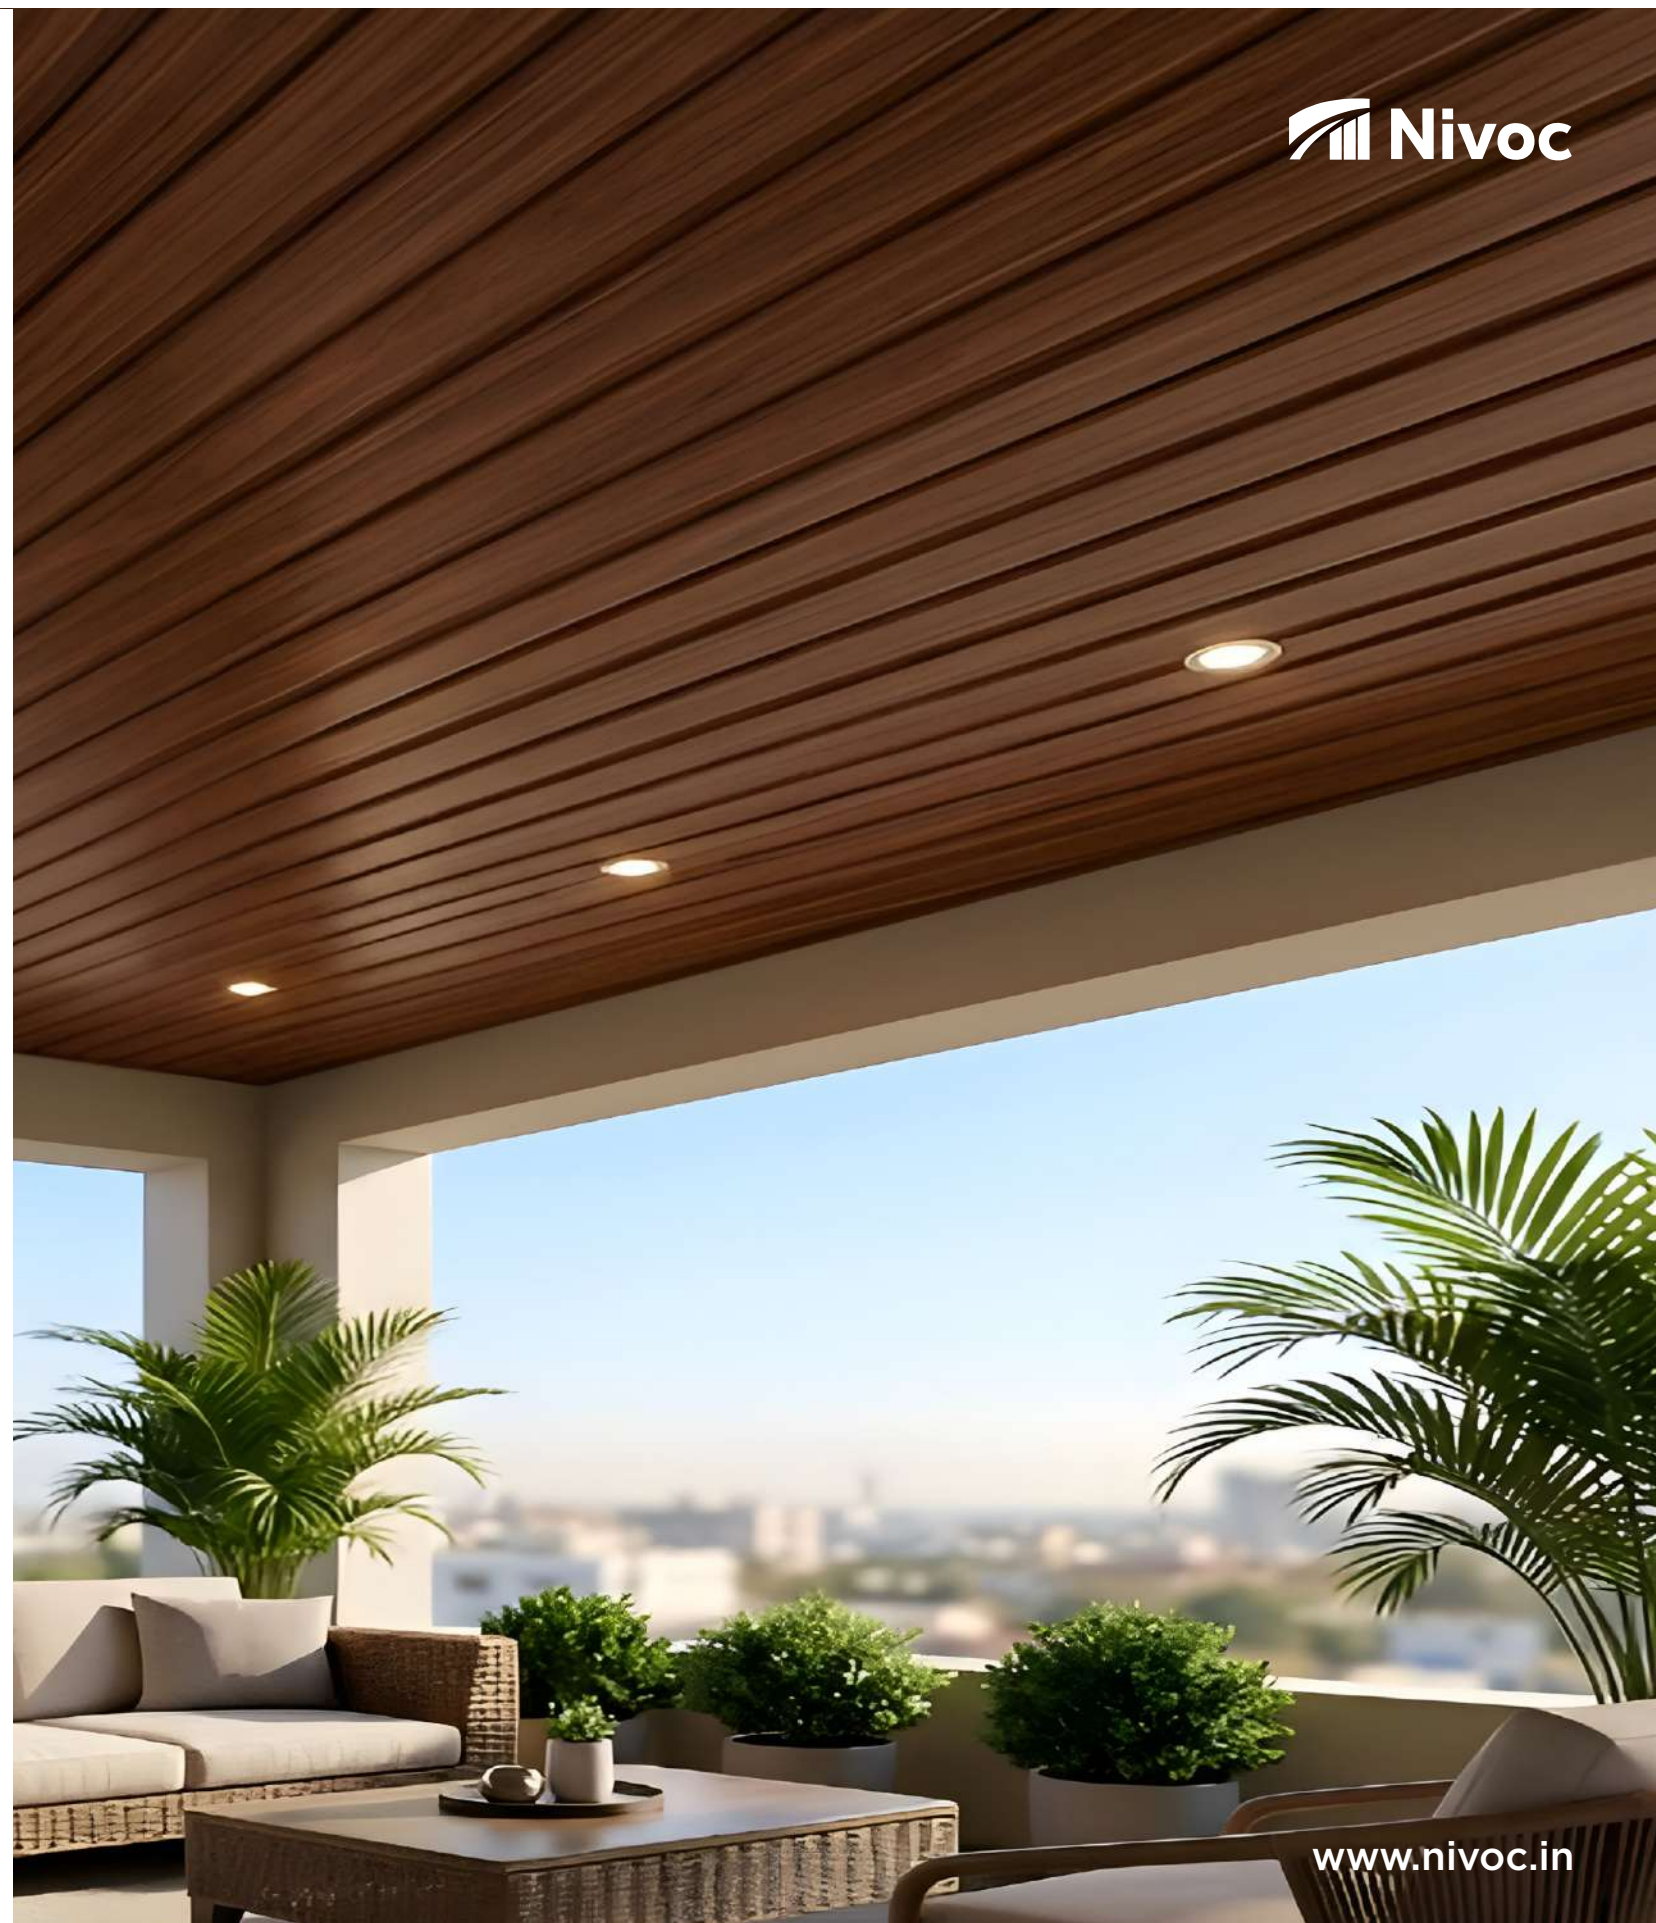

With a strong focus on supply efficiency, NIVOC ensures:

Ready stock availability for faster project execution

Consistent supply to avoid project delays and stock shortages

Bulk supply capability for large-scale and ongoing projects

Pan India delivery support for seamless supply across locations

SOFFIT PANELS

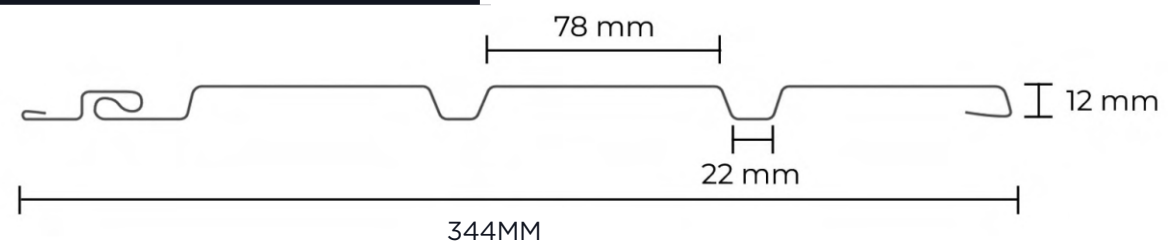

Smart Ceiling Solution for Modern Architecture

Soffit, real wood look and feel panels, made out of Polymer is the perfect blend of aesthetic appeal and convenience. Using Tongue and Groove interlocking technology, this product is very easy to interlock and looks seamless post installation.

Soffit Panels are specially designed decorative panels used for exterior ceilings, balcony ceilings, porch areas, canopies, terraces, parking zones, and commercial facades. These panels enhance the visual appeal of spaces while protecting surfaces from moisture, heat, and weather damage. They provide a clean, premium wood-like appearance with the benefit of easy maintenance and long-lasting performance.

Key Features & Advantages

Backed by industry expertise and a strong understanding of on-site challenges, NIVOC delivers consistent quality across every project. From commercial to residential applications, our systems are built to enhance both functionality and visual appeal.

Effortless Installation

Quick and easy setup for a seamless, professional finish.

Timeless Design

Elegant designs that never go out of style

Fire Retardant

Enhanced safety with reliable fire resistant properties.

Durable and Water Proof

Strong, long-lasting, and waterproof.

Hassle Free Longevity

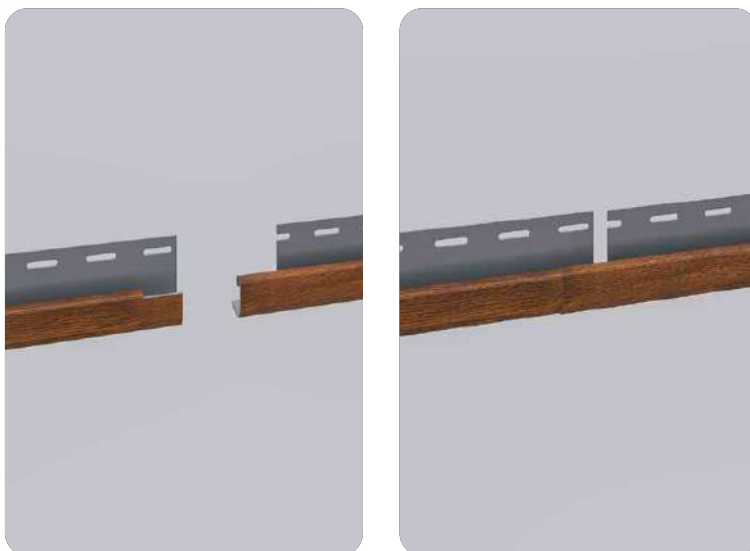

Long-lasting performance with minimal maintenance

ECO FRIENDLY

Safe and eco-friendly,

Installation Methodology

Connecting the trims
The overlapped edge trim connection allows for expansion and contraction in response to thermal variations.

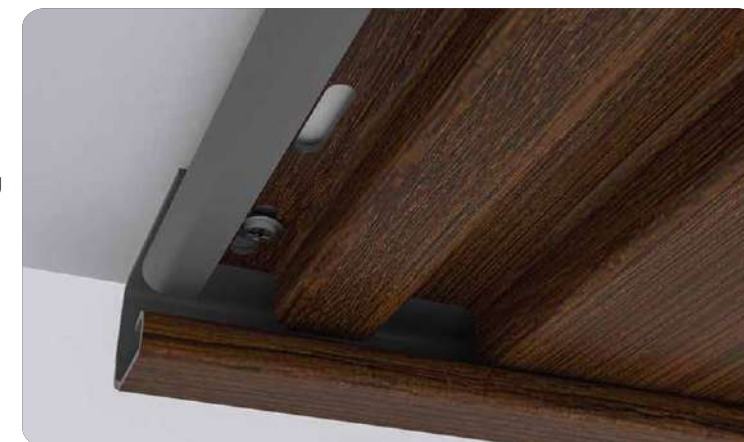

Installation of Soffit elements to a supporting structure

Soffit elements can be mounted to a simple supporting structure by means of corrosion protected screws (minimum length 20 mm and minimum head size 8 mm).

Slotted mounting holes

The screws should be driven perpendicularly to the ceiling in the middle of slotted mounting holes leaving around 1 mm clearance (in order to compensate for temperature related length variations)

Installation of ceiling boards

Cutting the ceiling boards to length

Ceiling boards must be cut to length in such a manner that the trims have 5 mm clearance to compensate for temperature related length variations.

Interlocking joints

Subsequent boards must be fixed to previously mounted ones.

The interlocking seamless joints not only enhance the aesthetic appeal but also contribute to the overall strength.

TONGUE & GROOVE INTERLOCKING

Advanced tongue & groove technology ensures perfectly aligned panel installation with a smooth, gap-free finish. The smart interlocking design minimizes visible joints, creating a clean and premium ceiling appearance.

Engineered for quick and hassle-free installation, the system enhances both aesthetics and structural stability, delivering a refined finish with long-lasting performance.
